Education

University of Alberta

Edmonton, Alberta

Bachelor of Science in Computer Science, Minor in Psychology

Experience

Full Stack Developer

Sept 2024 – Present

GROW Women Leaders

Edmonton, AB

- Designed and implemented the frontend and backend for a user-friendly job search platform using **React**, **Next.js**, **Django**, and **PostgreSQL**, ensuring seamless user experience and efficient navigation.
- Cross-functionally collaborated with other teams to translate ideas into functional features, enhancing the platform's ability to connect job seekers with relevant opportunities.
- Increased user engagement and platform revenue by developing visually appealing event pages and leading the development of the platform membership system, together accounting for **75%** of the company's total revenue.

Full Stack Developer

Jan 2025 – April 2025

TennisLinked

Edmonton, AB

- Designed and developed a cross-platform app using **React Native**, **Django**, and **PostgreSQL** enabling players to find hitting partners, book coaching sessions, and track match performance, fostering engagement in the tennis community.
- Developed core functionalities such as player matching based on location, availability, skill level, and playstyle, and streamlined the booking process for coaching sessions, providing seamless connectivity for tennis players and coaches.
- Implemented **CI/CD** pipeline using **GitHub Actions** to automatically test and deploy the application to **Heroku** on each merge to main.

Software Engineer Intern

May 2024 – August 2024

Guidewire Software

Toronto, ON

- Migrated legacy modules to microservices using **Kubernetes**, **Terraform**, **Helm Charts**, and **Docker**, improving deployment efficiency and scalability by up to **80%**.
- Developed and maintained backend services in **Java** (with **Spring Boot**) deployed on **AWS**, contributing to a reliable microservices architecture.
- Built and maintained **TeamCity CI/CD pipelines** with **automated tests** to ensure high-quality, reliable releases.
- Contributed to **Crossplane Provider Terraform** (open source) in **Go**, enhancing error reporting and reducing debugging time by **30%** for end users.

Software Developer

May 2023 – August 2023

Neurocage Systems LTD

Lethbridge, AB

- Designed and developed robust full-stack features using **Django**, **HTML**, **CSS**, and **JavaScript** to support data management and analysis.
- Built and optimized REST APIs and dynamic frontend components to improve user experience and responsiveness.
- Managed and queried large datasets using **MySQL**, contributing to efficient backend data handling.

Projects

Genie

- Built a **React**-based GUI styled with **Tailwind CSS** to improve marketplace item search in Stardoll.
- Developed advanced filtering in the **Express.js** backend, surpassing the in-game search features.
- Featured on the unofficial Stardoll Discord server with 1,000+ members and widely used in the Stardoll community.

FocusGuard

- Built a Google Chrome extension that intelligently blocks unproductive tabs to help users stay focused and reduce distractions.
- Integrated the **ChatGPT API** into the **Next.js** backend to classify tabs based on user-defined "unproductive" categories stored in **MongoDB**.
- Frontend powered by **TypeScript** and **React** for responsive and seamless extension configuration and tab monitoring.
- Winner of the DevelopEd 2.0 Hackathon, recognized for innovation in productivity tooling.

Technical Skills

Languages: Python, C, Java, JavaScript, RISC-V Assembly Language, Go, Lisp, Prolog, Terraform

Developer Tools: Android Studio, AWS, Cursor, GitHub Actions, Linux, Docker

Technologies/Frameworks: SQL, React, Next.js, Express.js, React Native, Django, MongoDB, Firebase, Kubernetes

Certifications: SnowPro Core Certification
