Education

University of Alberta

Edmonton, Alberta

Bachelor of Science in Computer Science, Minor in Psychology

Experience

Python Developer

Jan 2026 – Present

Procurify

Vancouver, BC

- Engineered and deployed robust workflows using Workato iPaaS, managing complex data transformations and schema mapping.
- Developed custom connectors and service extensions using Ruby on Rails and the Workato SDK, bridging the gap between visual automation and advanced technical requirements to enhance platform functionality.
- Designed and shipped custom integrations for various enterprise resource planning (ERP) platforms, such as Sage Intacct, Quickbooks Online, and Xero in a SaaS environment.
- Optimized integration cost-effectiveness by designing optimized and highly reusable workflows.

Software Engineer

Sept 2024 – Present

GROW Women Leaders

Edmonton, AB

- Developed and maintained full-stack web applications using React (JavaScript), Next.js, Django, and PostgreSQL, improving accessibility, scalability, and performance.
- Collaborated with cross-functional teams including product managers, designers, and developers to deliver responsive UI/UX aligned with accessibility and usability standards.
- Implemented reusable React components using design system patterns to maintain consistency across frontend systems.
- Increased user engagement and platform revenue by developing visually appealing event pages and leading the development of the platform membership system, together accounting for 75% of the company's total revenue.
- Improved developer tooling by streamlining code reviews, documentation, and automated checks.

Software Engineer

Jan 2025 – April 2025

TennisLinked

Edmonton, AB

- Built and deployed a cross-platform mobile app using React Native (JavaScript, Expo), Django, and PostgreSQL, focusing on maintainable architecture and optimized workflows.
- Developed core functionalities such as player matching based on location, availability, skill level, and playstyle, and streamlined the booking process for coaching sessions, providing seamless connectivity for tennis players and coaches.
- Designed and implemented CI/CD pipelines using GitHub Actions for continuous integration, automated testing, and deployment on Heroku.
- Enhanced development efficiency through developer tooling improvements and modular component design.

Software Developer

May 2023 – August 2023

Neurocage Systems LTD

Lethbridge, AB

- Designed and developed full-stack web features using Django, HTML/CSS, and JavaScript to support neuroscience data collection and analysis.
- Built RESTful APIs, optimized database queries (MySQL), and maintained data pipelines for performance and scalability.
- Ensured responsive, accessible front-end interfaces with cross-browser compatibility.

Projects

Genie

- Built a React-based GUI styled with Tailwind CSS to improve marketplace item search in Stardoll.
- Developed advanced filtering in the Express.js backend, surpassing the in-game search features.
- Featured on the unofficial Stardoll Discord server with 1,000+ members and widely used in the Stardoll community.

FocusGuard

- Built a Google Chrome extension that intelligently blocks unproductive tabs to help users stay focused and reduce distractions.
- Integrated the ChatGPT API into the Next.js backend to classify tabs based on user-defined "unproductive" categories stored in MongoDB.
- Frontend powered by TypeScript and React for responsive and seamless extension configuration and tab monitoring.
- Winner of the DevelopEd 2.0 Hackathon, recognized for innovation in productivity tooling.

Technical Skills

Languages: Python, C, Java, JavaScript, Go, Terraform

Developer Tools: Android Studio, AWS, GitHub Actions, Linux, Unix, Docker, Datadog, Bitbucket, Metabase

Technologies/Frameworks: SQL, React, Next.js, React Native, Django, MongoDB, Firebase, Kubernetes, Workato

Soft Skills: Problem-solving, attention to detail, continuous learning mindset, communication, collaboration
